**DETAILED ACTION**

**Status of the Application**

Receipt of the Amendment after Final Office Action and Applicant's Arguments filed 04/21/10 is acknowledged. The Amendment has been entered.

Claims 38 and 40 are pending in this action.

***Allowable Subject Matter***

Claims 38 and 40 are allowed.

The following is an examiner's statement of reasons for allowance: The primary reasons for allowance are that the prior art of record (Shimizu *et al.* - U.S. Pat. No. 6,299,904) does not disclose nor teach or fairly suggest a tablet consisting of the specific combination of ingredients as presently claimed whereby the tablet has a hardness of less than 1.5 kP. Shimizu does not teach the combination of a single saccharide and a low melting point compound to form a fast-dissolving granulation.

The instant invention demonstrates an improvement over prior art compositions, in that it provides for fast-dissolving tablets having low hardness and good physical stability whereby the tablets can be made using very low compression force and yet have acceptable stability.

In the Response filed 04/21/10, Applicant has overcome the claim objections (to claims 33 and 37), the 35 U.S.C. §112, first paragraph rejection (of claim 32) and the 35 U.S.C. §103(a) obviousness rejection (of claims 32 and 34-36) based on the cancellation of these claims. Accordingly, the instant invention is rendered novel and patentable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
